

The Showcase is intended to demonstrate the viability of diesel emission control systems in off-road construction applications, expand the pool of verified retrofit devices for construction equipment, and achieve near term emission reductions of PM and NOx in the South Coast Air Quality Management District. At this time, the source of funding for the Showcase is provided through the Mobile Source Air Pollution Reduction Review Committee (MSRC) which reports to the South Coast Air Quality Management District (AQMD). Therefore, applicants to the Showcase will be limited to fleets, owners, and/or operators of off-road diesel construction vehicles within the AQMD.

Applications for participation in the Showcase are expected to be available early March 2007. Information on participating in the Showcase will be available on the ARB's Showcase webpage at <http://www.arb.ca.gov/diesel/showcase/showcase.htm>, and the MSRC's webpage at <http://www.cleantransportationfunding.org>, as well as through subsequent listserve announcements.
